Dear Sir or Madam,

I am writing to submit my application for the Junior Data Science Analyst, a position that perfectly aligns with my professional aspirations.

With a background as an engineering student in computer science, specializing in Data Science and Artificial Intelligence in eastern France, I have developed extensive skills in the field of computing, particularly in programming and Machine Learning, as well as database management.

Throughout many projects done during my studies, I have cultivated a genuine passion for development of all kinds, especially in designing artificial intelligence algorithms. I am deeply committed to finding the most effective methods to achieve my goals in each of my projects.

My recent professional experience has provided me with both the knowledge and understanding of how a project reaches completion in an industrial environment. During both my internship and my most recent contract, I was able to deliver a fully functional internal product that is still widely used by the teams.

By joining your company, I would like to benefit from an opportunity to broaden my fields of knowledge and challenge my skills on a new interesting and innovative project. I am sure that the values and professionalism defended by my organization such as Deloitte will be catalysts for my professional and personal growth.

Thank you in advance for considering my application. I am available in September 2026 and remain at your disposal for any further information.

Yours sincerely,
